# MACHINE MONITORING & PRODUCTION MANAGEMENT

Visualize your Entire Shop in Real-Time

OnTakt enables machine shops of all sizes to easily leverage data to increase productivity and profitability.

Every shop should be able to implement new technologies that enable simple and intuitive management of shop floor activities.

➡ Manage production in real time with a simple interface.

➡ Easily connect machines in a single dashboard.

➡ Capture data & visualize operations to react on the shop floor.

SCHEDULE A DEMO

Understand your shop floor quickly and make decisions proactively.

Real-time machine monitoring enables you to quickly see what machines are behind schedule, which machines have excess capacity, and which machines can benefit from other process improvements like TMAC from Caron Engineering or robotic automation.

REDUCE DOWNTIME WITH REAL-TIME NOTIFICATIONS

OnTakt saves over $8,000 per machine every year as a result of real-time notifications.

Reduce unexpected downtime with real-time notifications through Slack and Teams. Leverage preemptive notifications to plan ahead for expected machine downtime from tool changes, maintenance, and changeovers.

VISUALIZE TOOL LIFE TO PREVENT UNEXPECTED MACHINE STOPPAGES

Tracking tool life and managing inventory with OnTakt can save over $10,000 per year.

Leveraging OnTakt to track tool life enables predictive notifications for upcoming tool changes. Grouping tool changes can significantly reduce machine downtime. Managing inventory with our smart ordering engine prevents costly tooling stockouts.
